

ZAMBIA SOCIAL FORUM 2024 ANNUAL REPORT

REPORT COMPILED BY ZAMSOF SECRETARIAT

Plot No 4225 Chilimbulu Road, Chilenje, Lusaka, Zambia

Zamssof.forum@gmail.com

www.zamssof.org

Executive Summary

In 2024, Zambia Social Forum (ZAMSOF) advanced its mission of promoting social justice, inclusive governance, and climate resilience through robust national, regional, and global engagement. Anchored in a human rights-based approach, ZAMSOF's work focused on agroecology, food sovereignty, climate justice, debt accountability, gender equity, and sustainable development.

Key achievements included the successful implementation of the Climate Justice Initiatives Project in Mufulira, Kapiri Mposhi, Sinazongwe, Chama, Mazabuka, and Lusaka, empowering smallholder farmers and local communities to adopt agroecological practices. ZAMSOF facilitated national policy dialogues, strengthened community participation, and amplified grassroots voices in environmental governance. The organisation also played a pivotal role in high-impact platforms such as the African Peer Review Mechanism, Zambia Debt Alliance, and the National Environmental Sustainability Governance Group.

Regionally, ZAMSOF led national consultations ahead of the SADC People's Summit and contributed to the Southern Africa People's Solidarity Network's 10-year strategic plan. Globally, ZAMSOF participated in the 2024 World Social Forum in Nepal and served on the United Nations Civil Society Organizations (CSO) Advisory Committee for Landlocked Developing Countries, reinforcing its role in global advocacy.

Institutionally, ZAMSOF enhanced its organizational capacity through training and strategic planning, supported by partners such as Humentum and the Ford Foundation. The launch of its official website and the growing participation of youth through the ZAMSOF Youth Connect Initiative marked critical steps toward sustainability and wider community engagement.

Despite challenges such as limited resources and low member participation, ZAMSOF remains committed to building resilient communities, advocating for climate and social justice, and strengthening civic spaces. The report underscores a strong foundation for future growth, innovation, and collaborative action in pursuit of a just and sustainable Zambia.

**Gershon Kabaso Jr, National Coordinator
Zambia Social Forum ((ZAMSOF))**

1.0 Background, Vision, Mission, Goal

Zambia Social Forum (ZAMSOF) is an open platform for citizens to discuss democracy on broad-based issues affecting them. Established in 2003, it is part of the World Social Forum of CSOS and has been organised annually in towns and communities. The forum aims to improve citizen participation in policy-making for national sustainable development and build community, regional, and global solidarity around social, ecological, political, and economic justice. It also provides human alternatives to neo-liberal discourse and challenges the status quo.

The Forum aims to engage citizens, community groups, and CSOS on a platform for citizen participation in policy-making, promoting better life and service delivery, and fostering sustainable development.

A society without injustices and poverty, promoting respect for human rights, democracy, peaceful relations, and equality. Emphasizing empowerment, inclusivity, and solidarity with the poor, this society promotes non-religious, and non-partisan approaches.

2.0 PROJECTS AND PROGRAMMES

Climate Justice Initiatives Project – Supported by IBON International through Bread for the World

The IBON Programme aimed to strengthen the capacity of Southern African Civil Society Organisations (CSOS) in the fight for climate justice. It was designed to enable organisations in Kapiri Mposhi, Mufulira, and Lusaka to enhance their campaigning, advocacy, and networking efforts. Additionally, the programme empowered Southern African CSOS to actively engage in and shape both sub-national and international platforms and mechanisms that address climate issues.

At the national level, the programme in Zambia was centered on accelerating the implementation of a comprehensive strategy that leveraged agroecology and food sovereignty as vital tools for climate change mitigation and adaptation. The overarching goal was to establish sustainable

farming practices as a recognised and integrated part of climate resilience efforts in Zambia to support sustainable farming systems. The programme outlined specific objectives. First, it aimed to advocate for greater awareness and the adoption of sustainable farming practices among policymakers. The programme highlighted the importance of food sovereignty and agroecological strategies in climate resilience planning. Second, amplified the voices of community CSOS through targeted engagement and campaigns that champion the rights of farmers to produce food in a manner that supports environmental justice and climate adaptation. These initiatives will focus particularly on the districts of Mufulira, Kapiri Mposhi, and Lusaka.

The programme targeted a diverse range of actors, including smallholder and peasant farmers, women, youth, Persons with disabilities, Environmental Human Rights Defenders, climate activists, community organisers, human rights advocates, students, and members of the media. Through inclusive and participatory approaches, the programme aspires to foster a united front in the pursuit of climate justice and sustainable development in Zambia.

Target Groups and Outreach Strategy

During the reporting period, the programme strategically identified and engaged both primary and secondary target groups to maximise the impact of its climate justice and agroecology advocacy efforts.

Primary Target Groups

The primary beneficiaries of the programme included smallholder and peasant farmers, policymakers, women, youth, persons with disabilities, environmental and human rights defenders, climate activists, community organisers, students, and media practitioners.

Direct outreach activities were designed to engage at least 140 women and 140 youth (aged 18 years and above) through traditional community engagement meetings and structured policy interface meetings with project stakeholders and beneficiaries.

In addition to the direct beneficiaries, the programme reached over 15,000 individuals indirectly through mass media channels, including radio and television broadcasts. Digital campaigns conducted via social media platforms such as Facebook, Twitter, and Instagram further extended the programme's reach, engaging approximately 6,300 users with climate and food sovereignty messaging.

Secondary Target Stakeholders

The programme also focused on influencing key secondary stakeholders involved in climate and agricultural governance. These included: -

- a) **Local Government Institutions:** Municipal Councils in Mufulira, Kapiri Mposhi, and Lusaka
- b) **Government Ministries and Agencies:** Ministry of Green Economy and Environment, Ministry of Agriculture, Ministry of Local Government and Rural Development, and the Zambia Environmental Management Agency (ZEMA)
- c) **Academic and Media Institutions:** Institutions of higher learning (colleges and universities), radio and TV stations
- d) **Civil Society Networks and Partners:** Development Education Community Programme (DeCoP), Green Nature, and the Zambia Consortium comprising 15 CSOS promoting seed sovereignty and traditional food festivals

Major Outcomes Achieved

Throughout the reporting period, the programme made notable strides in advancing its strategic objectives, resulting in a range of impactful outcomes. One of the key achievements was the successful facilitation of policy advocacy dialogues that brought together policymakers and citizen stakeholders. These engagements promoted inclusive discussions on climate action and food sovereignty, laying the foundation for collaborative policy development.

In parallel, the programme engaged duty bearers and decision-makers at various levels, including traditional leaders, civic authorities, and rural communities, which significantly strengthened support for the agroecology strategy process. These efforts culminated in concrete policy commitments that reflected growing institutional alignment with climate-resilient and sustainable farming practices.

To bolster advocacy efforts, a comprehensive position paper was developed. This document served to intensify national campaigns promoting food sovereignty and agroecology, while also underscoring their importance in Zambia's climate change adaptation and sustainable development framework.

Farmer awareness of sustainable and resilient food production systems was also notably enhanced. Targeted community outreach and educational activities helped build grassroots capacity and deepened understanding of agroecological approaches.

The programme further amplified community voices through advocacy campaigns that highlighted traditional diets and called for urgent responses to climate change. This not only empowered communities but also contributed to a broader public dialogue on environmental justice and food system transformation.

Additionally, a focused engagement on issues related to mining, climate change, and environmental impact was conducted in Mufulira. This resulted in a detailed follow-up report that documented community concerns and proposed recommendations for policy and action.

Field activities were systematically documented through photographs, videos, and narrative reports, all of which were compiled and shared by June 2024. These materials supported transparency and facilitated the sharing of best practices across partner networks.

Finally, the programme significantly enhanced its visibility through strategic communication efforts. Activities were widely publicised using a blend of traditional and digital media platforms, expanding public awareness and reinforcing the programme's advocacy messages across diverse audiences.

ZAMSOF's outreach fostered strong engagement among communities, media audiences, and policy actors, advancing the Agroecology and climate justice agenda. Smallholder women farmers felt empowered to share their experiences and gradually adopt sustainable practices, including drought-resilient crops like sorghum and millet. Community leaders appreciated the distributed materials: 50 t-shirts, 50 reports, and 3 banners for raising awareness and encouraging local participation in the named districts.

Broadcasts on Millennium, Metro FM, Makfen Radio, ZANIS, and ZNBC Television received positive feedback, sparking increased public interest and social media engagement. ZAMSOF's Facebook and Twitter platforms also saw significant interaction, indicating strong message resonance.

Agricultural extension officers and the Mayor's Office in Mufulira played pivotal roles, with officials from Mufulira, Lusaka, and Kapiri Mposhi expressing intent to escalate discussions on sustainable farming to higher levels, including the Presidency. Extension officers welcomed the engagement platforms and requested logistical support to reach more communities, reinforcing grassroots momentum for climate justice.

3.0 Civil Society and Conference Participants (Zambia 1st Agroecology Conference)

The first-ever Agroecology Conference, organised by PELUM Zambia, received praise from both local and international NGOS for its role in information sharing and networking. ZAMSOF led a session on “Information and Networking Building on Agroecology for Climate Justice,” fostering interest in future collaborations. Smallholder farmers reported feeling better informed and optimistic about policy changes and the development of support networks.

Zambia's 1st Agroecology Conference 2024		
Time	Topic	Responsible
	Group 5: Women and youth in agriculture Moderator: MoGEE – Miriam Mbeve Report writer: FIAN – Mkondo Lwamba • Role of women in agroecological food production - Action Aid • Youth in Agroecology farming (Gaps and opportunity) – YEFI, Richard Kachiungu • Gender responsive agroecology – ZAW, Edah Chimsa • Climate change impacts on women – ZCCN, Clara Sibajane • Gender and agriculture - CARE International, Ms. Majory Chonya Group 6: Information and networking Moderator: SIA, Wesley Wakunuma Report writer: PELUM, Chimika Lungu • Education and capacity building - NRDC • Scientific evidence and dissemination - UNZA, Dr Chabwe • Social media and digital information system - FAO • Farmer networks their importance - NUSFAZ, Ebony Lolosi • Movement building - ZAMSOF, Mr Kabasa • How to grow a network - experiences from ESAAF, Joe Muzinga Group 7: Integrated pest and disease management for crops and animals Host: GIZ Chairperson: Dr. Rhett Harris Senior landscape ecologist CIFOR ICRAF Assistant: Nomsa Chisomo Tembo (CABI) Report writer: Gloria Malanda Green Living Movement (GLM) • Botanical pesticide use in Zambia - Royd Michelo Farmer, Kasisi, Zambia • Agro-ecological pest management innovations: Dr. Frank Chidawanyika ICIPE Kenya • Biocontrol for sustainable and gender responsive agriculture - Dr. Lena Duracher-Cranger CABI, Zambia • Integrated Pest Management in Zambia: Crops; Dr. Sally Chikuta - Ministry of Agriculture (MOA), Zambia • Government strategies IPM Livestock: Dr. Vibetti Young-Ministry of Fisheries and Livestock (MFL), Zambia • Organic animal production: Mareike Volgts: Chairperson - Namibia Organisation Association (NOA), Namibia	
	Group 7: Integrated pest and disease management for crops and animals Host: GIZ Chairperson: Dr. Paul Kachapula, Senior Lecturer/Researcher at the University of Zambia Assistant: Nomsa Chisomo Tembo (CABI) Report writer: Esther Kabanda, Green Living Movement (GLM) • Biopesticides - Royd Michelo Farmer, Kasisi, Zambia • Agro-ecological pest management innovations: Dr. Frank Chidawanyika, ICIPE Kenya • Biocontrol for sustainable and gender responsive agriculture - Dr. Chapwa Kasoma, CABI, Zambia • Zambia's integrated pest management (IPM) in crops: Dr. Sally Chikuta, Ministry of Agriculture (MOA), Zambia • Lessons learned agroecological IPM practices in Zambia: Dr. Rhett Harris, ICRAF Zambia • Government strategies IPM Livestock: Dr. Vibetti Young-Ministry of Fisheries and Livestock (MFL), Zambia • Integrated animal management: Mareike Volgts, Namibia Organisation Association (NOA), Namibia	
13:00 - 14:00	Lunch break	
14:00 - 14:45	Synthesis from thematic groups and plenary discussions Presentation of synthesized discussions – Q & A session	Rapporteurs
14:45 - 16:00	Way Forward on the Conference Outcomes Develop a communique on conference outcomes and recommendations to government - FAO, Caritas, ZAAB, FIAN, CARE, GIZ, PELUM.	Nkandu Chikonde Jeston Lunda - CARE Gertrude Siame-CARITAS
16:30 - 16:45	Tea/Coffee Break	
16:00 - 16:30	Official closing ceremony • Participant feedback: Ms Chimika Lungu • Vote of thanks: PELUM Zambia • Closing remarks: Ministry of Agriculture • Official closing: His Royal Highness Chief Nkomo	

The conference, in collaboration, successfully engaged stakeholders at all levels, securing strong commitments from policymakers and duty-bearers to advance agroecology. Localised community engagement sessions tailored to women farmers led to higher adoption rates of agroecological practices, while a combination of traditional and social media maximised campaign outreach. Partnerships with like-minded CSOS, proactive government involvement, and a bottom-up approach helped integrate agroecology into broader policy frameworks. However, challenges like policy interpretation, resistance to change among farmers, and pesticide dependence required further education and demonstration efforts. The programme plans to enhance targeted campaigns and strengthen communication channels to streamline decision-making and increase support for agroecological practices.

4.0 Summary: Outputs and outcomes of the Engagement on Climate Justice

In the past year, significant strides were made in advancing the Agroecology strategy and promoting sustainable agricultural practices across Zambia. A series of policy advocacy dialogues saw the active participation of 10 policymakers and 280 citizen stakeholders, contributing to the broader discourse on climate resilience and food security. Efforts to engage duty bearers, including traditional leaders, civic leaders, and rural communities, helped garner critical support for the Agroecology strategy. Policy commitments were recorded, and a position paper was crafted to advocate for the adoption of food

sovereignty and climate change adaptation through Agroecology, aligning with Zambia's sustainable development goals.

Additionally, awareness was raised among farmers on sustainable food production, while a campaign amplified local voices on climate change and traditional diets. Follow-up engagements, particularly on mining, climate change, and environmental issues in Mufulira, furthered these discussions. Field activities were documented through photos, videos, and reports, with a comprehensive summary to be shared by June 2024. These efforts were widely publicised across multiple online and offline media channels, ensuring broad community engagement and advocacy for sustainable agriculture.

5.0 National Engagements

The African Peer Review Mechanism (APRM) was held in Zambia

In December 2024, Zambia Social Forum (ZAMSOF) participated in the African Peer Review Mechanism (APRM) workshop held in Lusaka, Zambia, in collaboration with the Zambia Ministry of Justice (MOJ). The workshop aimed to harmonise Zambia's Second Generation Country Review under the APRM, preparing for the Peer Review scheduled for February 2025. The main objective of the APRM was to assess and validate the consultation report generated by Zambia's National Governing Council (NOGC), which comprises leaders from Zambia's civil society.

The thematic areas under review for validation included: *Democratic and Political Governance, Economic Governance and Management, Socio-Economic Development, Corporate Governance, and State Resources for Shocks and Disasters*. ZAMSOF played a key role in presenting and contributing to the Socio-Economic Development (SED) theme, with inputs drawn from the SADC People's Summit Country Consultative and preparatory meetings held during the first and second quarters of 2024

6.0 Zambia Debt Alliance Platform

Zambia Social Forum (ZAMSOF) has been an active member of the Zambia Debt Alliance platform, with significant recognition for its engagement in the "Citizens' Actions Against Debt Justice in Southern Africa" project. This project, implemented from 2022 to 2023, spanned four countries: Zambia, Zimbabwe, Malawi, and Mozambique. ZAMSOF members played a crucial role in facilitating discussions and actively participating in thematic initiatives related to debt justice.

Additionally, CUTS International Zambia has been a key partner, collaborating with ZAMSOF in panel discussions focused on debt accountability mechanisms. These discussions highlighted the impact of debt on women, youth, and the social sector in Zambia, further solidifying ZAMSOF's commitment to advocating for equitable solutions to the region's debt challenges.

7.0 Environment Sustainability Governance Group

Zambia Social Forum (ZAMSOF) is actively involved in the National Environmental Sustainability Governance platform as a Non-State Actor (NSA), supporting the implementation of the Eighth National Development Plan, particularly the Environmental and Sustainability pillar. This cluster, co-chaired by the World Wide Fund for Nature (WWF) and the Ministry of Green Economy and Environment, oversees the coordination of environmental governance efforts. As part of its engagement, ZAMSOF contributes to the submission of the Non-State Actors (NSA) report every quarter to the Environmental Cluster, which is subsequently shared with the National Development Committee (NDC). The platform serves as a critical space for sharing information and addressing key environmental governance issues, ensuring that the voices and contributions of non-state actors are integrated into national development efforts.

8.0 Engagement on Fisheries Forum and Commemoration of World Fisheries Day

Zambia Social Forum (ZAMSOF) has been actively involved in policy formulation and engagement under the Department of Fisheries and Livestock. ZAMSOF also serves as the chairperson for the Communication and Outreach subcommittee of the Zambia Sustainable Forum for Fisheries and Aquaculture. This forum has played a key role in advocating for the inclusion of women and youth in the fisheries and aquaculture sectors. These efforts reflect ZAMSOF's ongoing commitment to enhancing sustainable practices and promoting inclusive participation in Zambia's fisheries and aquaculture sectors.

9.0 ENGAGEMENTS ON INTER-GENERATIONAL GENDER CONFERENCE

Zambia Social Forum (ZAMSOF) actively participated in the "*Bridging the Gap*" Conference for Young Women on Promoting Collaboration Towards Addressing Gender Equity and Equality Programme, held from September 24–25, 2024, at the Best Western Hotel. The event was attended by ZAMSOF Youth Connect Initiative representatives, Luyando Mweene and Constance Ngenda. The conference aimed to assess the current landscape for women in Zambia, featuring influential figures like Sara Longwe, who shared their experiences of advocating for beneficial change for women. The conference focused on building the confidence and capacity of young Zambian women to address gender equity and equality challenges, while also empowering them to tackle broader development issues in the country.

In addition, ZAMSOF participated in a national-level meeting in January 2024 at the Joint Country Programme (JCP) office in Lusaka, which brought together civil society organisations (CSOs) for coordinated advocacy on land, natural resource governance (NRG), and climate change. The

meeting provided a platform to discuss joint efforts for sustainable resource use, including a review of the Zambia Alternative Mining Indaba (ZAMI) and emerging environmental issues such as mine safety, deforestation, and the impact of foreign investments on local livelihoods. Participants underscored the need for policy validation on climate change, environmental protection, and mineral revenue sharing. The upcoming Alternative Mining Indaba in South Africa and the EU-Zambia Business Forum were highlighted, with a call for better coordination of advocacy efforts. The meeting concluded with a commitment to virtual meetings to align priorities ahead of the Indaba and share key discussion points among stakeholders.

10.0 Regional Engagements

Southern Africa Peoples Solidarity Network Strategic Plan Process

ZAMSOF, with support from the Civil Society for Poverty Reduction (CSPR), led national consultative processes in preparation for the 2024 Southern African Development Community (SADC) People's Summit, held in Zimbabwe. These consultations culminated in the Zambia Validation Meeting for the People's Summit, hosted at Palm Wood Lodge with over 30 participants, including representatives from CSOS, community members, and human rights defenders. The meeting focused on planning and Organising for the summit, and the final communiqué was validated and presented to the National Ministry of Foreign Affairs and the Southern Africa People's Solidarity Network (SAPSN) Secretariat to inform the regional communiqué outcome.

Despite significant support from strategic partners, including Water Aid Zambia, which had shown interest in sponsoring youths and women participants in the Water and Sanitation Governance cluster, the support was suspended due to human rights and security concerns obstructing safe passage by local authorities in Zimbabwe. As a result, only a small group of over 26 Zambians from various clusters could attend under challenging conditions. The 2024 People's Summit was held in isolated locations within Harare, deviating from the usual practice of convening at centrally located venues, further highlighting the difficult circumstances faced by participants.

11.0 SAPSN Strategic meeting alongside the 2024 Alternative Mining Indaba AMI

In February 2024, Zambia Social Forum (ZAMSOF), through the Southern Africa People's Solidarity Network (SAPSN), participated in a strategic planning meeting held in Cape Town. The new strategy for SAPSN aims to amplify the voice and power of people in Southern Africa, positioning them as key agents for socio-economic and political justice. This strategy seeks to hold governments and corporations accountable, with a vision of justice and equality across the region.

The strategic programming will focus on four key thematic areas: *Economic Justice, Extractives and Environmental and Climate Justice, Civic Space and Democratization, and Institutional Sustainability*. The new strategic plan, which will guide SAPSN's work from 2024 to 2034, is structured into five-year cycles. The strategic framework is set to be officially launched and will direct SAPSN's activities and advocacy efforts for the next decade.

12.0 Global Engagements

World Social Forum Nepal and Least Developed Countries LDC Agenda

Zambia Social Forum participated in the World Social Forum held in Kathmandu, Nepal, from February 15-19, 2024, under the central theme "Another World Now." This event was one of the largest in the history of the World Social Forum, attracting over 80,000 participants globally. The main outcome of the forum was the strengthening of social forum processes at the local level, particularly focusing on underserved women, men, youth, and human rights defenders. These groups were encouraged to be proactive agents of change in environmental, social, economic, and cultural sectors. A key takeaway from the forum was the call for international organisations (INGOS) to ensure that the localization agenda is effectively implemented for the benefit of local communities.

In addition to the main forum, ZAMSOF was actively involved in facilitating and speaking at World Social Forum side events, as well as annual meetings organised by LDC Watch. These events covered a range of important topics, including the United Nations Future Summit, financial tax vision, the fight against inequalities, workers' and human rights, social protections for domestic workers, the SDGs agenda, and the graduation agenda for Least Developed Countries (LDCs). The next World Social Forum will be held in Benin, Africa, in January 2026.

In June 2024, Zambia Social Forum (ZAMSOF), serving as the Africa Coordinator for the People's Coalition on Food Sovereignty (PCFS), was certified as a Trainer of Trainers in the Movement for Agroecology and Food Sovereignty. The certification was awarded by the Global People's Coalition on Food Sovereignty during a regional training held in Kampala, Uganda.

The certification of Zambia Social Forum (ZAMSOF) as **a Trainer of Trainers in Agroecology and Food Sovereignty** by the Global People's Coalition on Food Sovereignty marks a significant achievement in strengthening the organisation's leadership role within Africa. This milestone enhances ZAMSOF's capacity to support grassroots movements, promote sustainable, community-driven food systems, and contribute more effectively to the advancement of food sovereignty. Furthermore, the certification increases ZAMSOF's international visibility, broadens its network of partners, and creates new opportunities for collaboration, advocacy, and future programme development.

13.0 Organisational Capacity Development and Sustainability

ZAMSOF Strategic Planning Process and Key Focus Areas

ZAMSOF has already begun its strategic planning process for 2025-2027, focusing on empowering communities, promoting inclusive participation, and driving resilience through advocacy, policy engagement, and innovative initiatives. The forum's strategic direction aims to advance climate justice, sustainable development, social and economic equity, and democratic governance, with a strong emphasis on gender equality, youth empowerment, and human rights.

The process is guided by ZAMSOF's core values of empowerment, inclusivity, equality, solidarity, and respect for human rights, ensuring that diverse voices are heard and actively contribute to systemic change. The key thematic areas driving this process are *Inclusive Governance, Climate Justice, Agroecology & Food Sovereignty, Socio-Economic Justice, The Voice and Accountability -Integrated Movement Building, and Organisational Sustainability*. Through this focused approach, ZAMSOF aims to create transformative social, environmental, and economic change at both national and regional levels. The consolidation, Validation, and launching meetings are being planned for in coming year 2025.

14.0 Overall Success on Capacity Development and Network Building

ZAMSOF has made significant progress in strengthening its organisational capacities and networking processes over the past year. Key developments include:

Training on African Movement Building supported by Social Movement Technologies (SMTS), aimed at enhancing ZAMSOF's capacity for grassroots mobilisation and advocacy using digital spaces.

Certified as a Trainer of Trainers in the Movement for Agroecology and Food Sovereignty. The certification was awarded by the Global People's Coalition on Food Sovereignty during a regional training held in Kampala, Uganda

As part of internal capacity building, ZAMSOF benefited from virtual training on Basic Financial Management, Strategic planning, and Sustainability, facilitated by Humentum under the Ford Resilience Project. Which laid the fundamental foundation for ZAMSOF's future direction and sustainable growth.

Development of the ZAMSOF Website (www.zamsof.org), enhancing ZAMSOF's online presence and visibility. With Support from IQApex Technologies based in India.

Skilled and experienced professional personnel, mostly serving voluntarily, have been supporting the ZAMSOF Secretariat to ensure smooth operations and effective programme implementation

Willingness Among the Youthful Generation to engage in ZAMSOF's activities, creating a vibrant and energetic community through ZAMSOF Youth Connect Initiative.

Recognition of ZAMSOF's Work by multi-stakeholders at national, regional, and global levels, demonstrating the impact and relevance of ZAMSOF's initiatives.

Member of the United Nations CSO Advisory Committee for Landlocked Developed Countries (LLDC3, reinforcing ZAMSOF's influence and role in global policy discussions related to the Least Developed Countries (LDCS).

15.0 Overall Challenges

1. Limited financial resources affect the scope of work and outreach expansion.
2. Insufficient support for ICTs and communication efforts.

3. Weak participation of ZAMSOF members in thematic commissions.
4. Inadequate committed membership engagement on across thematic participation.

16.0 Overall Recommendations

1. Revamp thematic working commissions at both national and district levels to increase engagement and impact.
2. Formation of the ZAMSOF Youth Connect Initiatives in 10 districts across Zambia's ten provinces to foster youth involvement and leadership.
3. Enhance joint resource mobilisation and collaborative implementation efforts to address financial challenges.
4. Launch a campaign for integrated movement building to increase ZAMSOF's visibility and expand membership.
5. Strengthen capacities in communication and define clear roles and responsibilities at the Secretariat level.
6. Focus on organisational capacity development and financial sustainability to ensure long-term impact and effectiveness.

17.0 Acknowledgments

ZAMSOF acknowledges the valuable support received from its partners in 2024. **Humentum and the Ford Foundation** supported internal capacity building in financial management, governance, and sustainability. **IQAPEX Technologies (India)** developed the official ZAMSOF website: www.zamsof.org. **LDC Watch** facilitated ZAMSOF's participation at the World Social Forum in Nepal, while **CSPR Zambia** supported pre-planning for the 2024 SADC People's Summit, and NGOCC for providing venue for both pre-post SADC Peoples Summit meetings.

IBON International provided financial and technical support for climate justice actions in Mufulira, Kapiri Mposhi, and Lusaka. **ActionAid Zambia** contributed to administrative costs, and the **People's Coalition on Food Sovereignty (PCFS)** offered technical support and solidarity in promoting food sovereignty in Zambia and across Africa.
